ULTRALEVEL ANNOUNCES DISASTER RECOVERY “LUNCH & LEARN” FOR IT EXECUTIVES

“Green Servers and SAN” event to feature end-to-end business continuity technology solutions from VMware, Data Domain and Dell-EqualLogic.

Troy, MI – UltraLevel announced the “Green Servers and SAN” Disaster Recovery event to be held Thursday, August 7th, 12:00pm – 3:30pm at Maggiano’s Restaurant, located at 2089 W. Big Beaver Rd., Troy, Michigan. IT executive attendees will be UltraLevel’s guests at a sit down lunch to learn the benefits of the latest virtualization & disaster recovery technologies available from VMware, Data Domain, and Dell-EqualLogic.

Through the real-world scenario of a simulated catastrophe and accompanying data center fail-over and recovery demonstration, attendees will see firsthand how IT services can be rapidly restored and made available to end users when a disaster renders a primary datacenter totally inoperable. The simulation and demonstration will be followed by business solution-focused discussions led by UltraLevel technology advisors and vendor partner representatives.

Featured technologies include VMware’s server virtualization, Data Domain’s data deduplication storage systems, and Dell-EqualLogic’s storage virtualization and replication solutions.

“With the virtualization and storage replication technology that’s now available, IT professionals can take steps to be prepared for any threat to business continuity. This has been a deadly year of tornadoes in the Midwest U.S., which really emphasizes the importance of preparing your company for the event of catastrophe. Plus, in a turbulent economic climate, companies can achieve significant IT cost savings and they can do so in an energy efficient “green” manner – conserving resources and limiting their overall carbon footprint,” explains Michael L. Butz Sr., President of UltraLevel.

To register for this event, visit the Event Registration page at <http://www.ultralevel.com/greenserversandsanDRevent> or contact David Bitel at 313.875.1111, extension 313.

About Ultralevel

UltraLevel is headquartered in Detroit, Michigan and is focused on utilizing technology to maximize our client’s bottom line. Our slogan “Real. Virtual. IT. Solutions” tells you a thing or two about our offerings, but our approach of looking at our client’s business holistically and implementing solutions that will impact their bottom line are what sets our firm apart. We do more than everyday network implementation and strive to be recognized as trusted business advisors, not just information technology experts.
